

# OUR COMPANY

Transform treatment plan into computer guided surgical template

Place Implants and Abutments directly into 3D DICOM data with no conversion/molding

High-Quality volume rendering - full 360° around implant/anatomical structure

[www.spiraltech.com](http://www.spiraltech.com)

Founded in 2012, SpiralTech was created to fill a void in the dental implant world, simplified treatment and paired with the best technologies and service.

We wanted to provide innovative designs, along with the necessary education and service, to doctors of all experience levels.

Ultimately, we desired to enhance the doctor and patient experience. The ESi implant product line, is the first step in what we see as a continuous journey towards clinical excellence.

Feature	Details	SpiralTech	Anatontage, Simplant, BlueSkyBio, 3d Diagnostix
Works on Mac, PC, Linux, Selected Tablets (TBD)	SpiralTech is a cloud-based platform that is accessed via web browser and runs on any desktop, laptop, or sufficiently powerful tablet (iPad Pro, Microsoft Surface)	YES	NO
No installation required		YES	NO
Cutting-edge high performance 3D imaging technologies	Based on WebGL and deployed on Amazon Web Services, SpiralTech uses parallel computing to render 3D models for maximum performance.	YES	NO
Secure, redundant off-site backups	As a cloud-based system, all data uploaded to the SpiralTech platform is backed up securely without any effort from users.	YES	NO
Automatic HIPAA compliance	Since data uploaded to SpiralTech is stored in the cloud, you decide which users have access to each patient's data. For protection of patient data, all uploaded content is encrypted during transmission and at rest on SpiralTech servers.	YES	NO
New features and updates	Other dental implant planning platforms release upgrades on an annual or semi-annual basis. SpiralTech constantly releases upgrades based on user feedback and as new technologies become available.	CONTINUOUS	Once per year (or less)
Real-time collaboration with colleagues	SpiralTech cases can be shared with another clinician in your practice. That individual can then log into the system, and you can simultaneously work on placing implants on the same 3D model.	YES	NO
One-click export to 3D printer or lab	SpiralTech uses advanced API technology to integrate with medical printing laboratories so that you can easily export your surgical template, or print it via your in-office 3D printer.	YES	NO
Access to best-in-class SpiralTech implants and abutments	Only SpiralTech software has access to this cutting-edge line of dental implant products. The SpiralTech implants you place on your 3D model can be automatically ordered from SpiralTech with a single click.	YES	NO
